Installing the product

Mounting clip G installation

Lighting can be freely oriented for (360°) installation

Recommended screw:
Flat head screw M3

Mounting clips are designed to hold the luminaire in place by spreading both sides. Please leave at least 2mm of gap on both sides for maintenance.

Please make sure to flush the flat head of screws with the surface of the mounting parts. Otherwise, the lighting fixture may not be completely hooked and fall off.

Mounting clip G and Lift Parts installation

Recommended screw:
flat head screw M3*15

Lift parts must be used with ① ② ③ Mounting clip

Mounting clip G and Magnet installation

Mounting clip D installation

Install lighting vertically or not want clip to be visible
Lighting and clip must be same as direction in screw driven

Recommended screw:
Flat head screw M3

Please make sure to flush the flat head of screws with the surface of the mounting parts. Otherwise, the lighting fixture may not be completely hooked and fall off.

Mounting clip D and Magnet installation

Recommended screw:
flat head screw M3*15

Lift parts must be used with ① ② ③ Mounting clip

Mounting clip F installation

Install lighting 45° or vertically or not want clip to be visible
Lighting and clip must be 45° direction only

Recommended screw:
Flat head screw M3

Please make sure to flush the flat head of screws with the surface of the mounting parts. Otherwise, the lighting fixture may not be completely hooked and fall off.

Mounting clip F and Magnet installation

Recommended screw:
flat head screw M3*15

Lift parts must be used with ① ② ③ Mounting clip

Recommended position of clip and magnet

Recommended mounting position (pitch: 20mm to 300mm, quantity: 2 to 5 pieces) depends on the length of the luminaire. Please refer to the attached table on p.8

System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)
