### Prohibited installation places:

When using EFRO in semi-outdoor, it must be installed with the aluminum rail for EFRO. Please installed the LED fixture and the cable within the range of 45° eaves of the roof and 300 mm or more away from the ground or the floor. Please do not install the LED fixture and cables in the follow place:

- direct expose to water or pooling of water
- direct sunlight
- liquids including choline or chemicals
- high temperature and high humidity such as saunas and public bath
- coastal areas which are affected by sea spray

**Caution**  
Do not cut the LED fixture and the lead wire of outdoor product at a job site. Please do appropriate treatment for the lead wire and connector of the terminal of outdoor LED fixture.

## Installing the product

### Straight installation

#### Installation with Mounting Clip

Attach Mounting clip for EFRO (LRO-PT-A) at below position with screws supplied by installer (Pan head screws M4 recommended), and insert the LED fixture with considering the direction of the connector of power supply cable side. See below picture for holding the cable and connector underneath the LED fixture. Downwards installation is available as well.

#### Recommended position of Mounting clips

### Vertical installation

Make sure the bottom of LED fixture hook on the edge of the Mounting clip in accordance with the diagram.

**Caution:** If the weight of the LED fixture is not supported by the edge of the Mounting clip, it may slide down and fall.

#### Installation with Mounting Rail

1. Attach Aluminum mounting rail for EFRO (LRO-RL\*\*\*\*-AL) at below position with screws supplied by installer (Pan head screws M4 recommended)
2. Insert the LED fixture with considering the direction of the connector of power supply cable side.
3. After passing the cable through the cable outlet of the end cap, fix the end cap to the rail by screws attached with the products.

Note: The order of installation can be changed by the situation of the site.

Note: Please fix with the same number of screws as the number of screw holes.

Make sure the bottom of LED fixture hook on the edge of the end cap for aluminum rail in accordance with the diagram.

**Caution:** If the weight of the LED fixture is not supported by the end cap for aluminum mounting rail, it may slide down and fall.

#### Position of connector

## System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)
